TABLE OF CONTENTS

1 *Introduction*

1.1 Introduction ---------- 2
1.2 Brief History of Java ---------- 2
1.3 Characteristics of Java ---------- 2
1.4 Java Architecture (How Java Works) ---------- 4
1.5 Compiling and Running Java Program ---------- 5
1.6 PATH and CLASSPATH Variables ---------- 8
1.7 Arrays in Java ---------- 10
1.8 Class and Objects ---------- 15
1.9 Overloading Methods ---------- 19
1.10 Constructors ---------- 20
1.11 Keyword "this" ---------- 22
1.12 Static Members and Methods ---------- 23
1.13 Access Modifiers ---------- 26
1.14 Inheritance ---------- 27
1.15 Method Overriding ---------- 30
1.16 Dynamic Method Dispatch ---------- 32
1.17 Execution of Constructors in Multilevel Inheritance ---------- 34
1.18 Final Modifier ---------- 36
1.19 Interface ---------- 38
1.19 Abstract Classes and Methods ---------- 42
1.20 Interface versus Abstract Class ---------- 43
1.21 Packages ---------- 43
1.22 Exception Handling ---------- 45
1.23 Multithreading ---------- 57
1.24 File Handling in Java ---------- 64
Exercise ---------- 67

2 The Applet Class

2.1 Applet Basics ---------- 70
2.2 The Applet Tag ---------- 71
2.3 Two Types of Applets ---------- 73
2.4 An Applet Skeleton (Life Cycle of an Applet) ---------- 74
2.5 Passing Parameters to Applet ---------- 77
Exercise ---------- 79

3 GUI with AWT

3.1 Introduction to AWT ---------- 82
3.2 AWT Classes ---------- 82
3.3 Window Fundamentals ---------- 83
3.4 Working with Frame Windows ---------- 85
3.5 Creating a Frame Window in an Applet ---------- 87
3.6 Control Fundamentals ---------- 89
3.7 AWT Component Classes ---------- 90
3.8 Menus and Menubars ---------- 99
3.9 Dialog Boxes ---------- 104
3.10 FileDialog Box ---------- 106
Exercise ---------- 108

4 Layout Management

4.1 Introduction ---------- 110
4.2 Flow Layout ---------- 110
4.3 Border Layout ---------- 112
4.4 Grid Layout ---------- 114
4.5 GridBag Layout ---------- 116
4.6 Card Layout ---------- 119
4.7 Group Layout ---------- 121
5.8 No Layout Managers (Absolute Positioning) ---------- 122
4.9 Custom Layout Managers ---------- 123
Exercises ---------- 124

5 GUI with Swing

5.1 Origin of Swing ---------- 126
5.2 Swing Is Built on the AWT ---------- 127
5.3 Two Key Features of Swing ---------- 127
5.4 Swing and MVC ---------- 128
5.5 Difference between Swing and AWT ---------- 128
5.6 Swing Components and Containers ---------- 129
5.7 Creating GUI by Using Swing ---------- 130
5.8 Basic Swing UI Controls ---------- 131
5.9 Using Borders ---------- 140
5.10 Swing Menu ---------- 144
5.11 Swing ToolBar ---------- 149
5.12 Creating Dialog Boxes ---------- 150
5.13 Using Internal Frames ---------- 158
5.14 Advanced Swing Components ---------- 160
Exercise ---------- 167

6 Event Handling

6.1 What is Event Handling? ---------- 170
6.2 Two Event Handling Mechanisms ---------- 170
6.3 Key Event Classes ---------- 172
6.4 Sources of Events ---------- 173
6.5 Event Listener Interfaces ---------- 174
6.6 Where to put Event Handing Code? ---------- 176
6.7 Using Action Commands ---------- 180
6.8 Listener Interfaces vs Adapter Classes ---------- 181
6.9 Using Delegation Model to Handle Events ---------- 182
6.10 Inner Classes ---------- 195
Exercise ---------- 196

7 Java Database Connectivity

7.1 JDBC Basics ---------- 198
7.2 Steps to connect to the database in java ---------- 202

7.3 The PreparedStatement Objects ---------- 206
7.4 SQL Exceptions ---------- 208
7.5 DDL and DML Operation using Java ---------- 209
7.6 Scrollable and Updateable Resultsets ---------- 211
7.7 Row Sets and Cached Row Sets ---------- 211
7.8 Multiple Results ---------- 213
7.9 SQL Escapes ---------- 215
7.10 Transactions in Java ---------- 215
7.11 Reading and Writing LOBs ---------- 217
7.12 Connection Pooling ---------- 218
7.13 Mini Project ---------- 219
Exercise ---------- 240

8 *Network Programming*

8.1 Networking Programming Basics ---------- 242
8.1.1 Transmission Control Protocol (TCP) ---------- 242
8.1.2 User Datagram Protocols (UDP) ---------- 243
8.1.3 Understanding IP Address and Port ---------- 243
8.2 Sockets and Socket-based Communication ---------- 244
8.3 Networking Classes in the JDK ---------- 244
8.4 Socket Programming Using TCP ---------- 245
8.5 Socket Programming Using UDP ---------- 252
8.6 Working with URLs ---------- 256
8.7 InetAddress Class ---------- 259
8.8 JavaMail APIs ---------- 259
8.9 Addition with Client/Server Solution ---------- 264
Exercise ---------- 266

9 *Java Beans*

9.1 JAR Files ---------- 268
9.2 What is a JavaBean? ---------- 270
9.3 Beans Development Kit (BDK) and Bean Box ---------- 272
9.4 Bean Writing Process ---------- 274
9.5 Bean Properties ---------- 279
Exercise ---------- 280

10 Servlet Programming

10.1 Fundamentals of Web Programming ---------- 282
10.2 Server Side of the Web Application ---------- 283
10.3 Servlet and Servlet Technology ---------- 285
10.4 Environment Setup for Servlets ---------- 286
10.5 Servlet Life Cycle (Steps for Writing a Servlet) ---------- 289
10.6 Servlets APIs ---------- 290
10.7 Processing HTML Form Data Using Servlets ---------- 293
10.8 Reading All Form Parameters ---------- 297
10.9 Reading Initialization Parameters ---------- 299
10.10 Cookies in Servlet ---------- 301
10.11 Session Tracking in Servlets ---------- 305
10.12 Database Access with Servlets ---------- 307
10.13 Request Dispatcher ---------- 310
Exercise ---------- 314

11 Java Server Pages

11.1 Basic of Java Server Pages ---------- 316
11.2 JSP Syntax ---------- 318
11.4 Scope of JSP Objects ---------- 320
11.5 Form Processing in JSP ---------- 323
11.6 Database Access with JSP ---------- 326
11.7 Exception Handling in JSP ---------- 329
11.8 JSP Session Tracking ---------- 331
11.9 Java Beans in JSP ---------- 333
Exercise ---------- 336

12 Java Server Pages

12.1 Introduction to RMI ---------- 338
12.2 Interfaces: The Heart of RMI ---------- 338
12.3 RMI Architecture Layers ---------- 339
12.4 Writing RMI Programs ---------- 341

12.5 Parameters in RMI ---------- 344
12.6 An Introduction to CORBA ---------- 344
12.7 Architecture of CORBA ---------- 345
12.8 The functions of CORBA Applications ---------- 347
Exercise ---------- 347

13 *Enterprise Applications and XML with Java*

13.1 J2EE Overview ---------- 350
13.2 J2EE Architecture ---------- 350
13.3 Enterprise Architecture ---------- 352
13.5 What is XML? ---------- 353
13.6 Why XML? ---------- 353
13.7 XML Document ---------- 354
13.8 Document Type Definition (DTD) ---------- 355
13.9 XML Schema ---------- 356
13.10 XML Parsing ---------- 358
Exercise ---------- 364
